### Suggested Vegetables for Rabbits

We recommend offering a variety of vegetables to your bunny every day. Add one vegetable to the diet at a time, and reduce or eliminate it if it causes soft stools or diarrhea. Rinse vegetables well before feeding them to your pet. Provide each rabbit with 1-2 handfuls of greens per day.

Arugula	Endive
Basil	Escarole
Beet greens	Green peppers
Bok Choy	Kale
Broccoli	Mint
Brussel sprouts	Mustard greens
Cabbage	Parsley
Carrot tops	Peppermint leaves
Cauliflower	Raddichio
Celery	Raspberry leaves
Cilantro	Romaine lettuce
Clover	Spinach
Collard greens	Watercress
Dandelion greens	Wheat grass

### Foods to Avoid

Like horses, rabbits can colic if fed excess calories or carbohydrates. High carbohydrate foods such as the ones listed below can lead to fatal cases of enterotoxemia, a toxic overgrowth of bad bacteria in the intestinal tract. Occasional treats such as a small slice of carrot or a small slice of fruit are usually tolerated, but the following items should be avoided entirely.

Beans	Crackers
Bread	Nuts
Breakfast cereals	Onions
Corn	Pasta
Dried fruit	Peas
Chocolate	Potatoes
Cookies	Yogurt drops
